

## **QUALITY COORDINATOR Vaccine Research and Development (0.6-0.8 FTE)**

Are you a talented Quality Coordinator with experience, then we would like to welcome you in our team!

### **About the role.**

In this role you are primarily responsible for the implementation, coordination, and maintenance of the Vaxxinoa Quality System (VQS); a system similar to and based on Good Laboratory Practices. To this end, you will prepare and maintain departmental / general Standard Operating Procedures using our controlled document system, you will organize certification and maintenance of laboratory equipment and systems and you will advise the R&D team in validation of equipment and test methods.

Other important objectives of your role are to keep track of relevant regulations, to evaluate the applicability for the R&D department and to align quality standards with other Vaxxinoa Group entities.

### **About you.**

As a person, you set high standards for your own performance, you can work independently, and you show an intrinsic drive to succeed. You can act assertively when it comes to implementation of quality standards in the Research and Development departments. You have in depth experience with GLP and are able to translate this into our quality system.

To be effective in this role, you are able to understand and explain the origin and reasoning behind key policies, practices, and procedures, you are able to motivate others to set high quality standards and you have experience in training people in the area of quality and compliance.

A team player? That is also you; you relate well to all kinds of people; you can build constructive relationships and can use diplomacy and tact if required.

### **In addition:**

- Diploma in life science, BSc or Msc (HBO+)
- Minimum of 3 years' relevant working experience as a QA officer. Experience with validation of laboratory equipment and tests is a prerequisite.
- Used to work with/contact local, national and international authorities
- Professional proficiency in Dutch and English both written and spoken is required
- Ability to work in an international environment

### **Vaxxinoa Nederland B.V., part of the Vaxxinoa Group**

Vaxxinoa develops, produces, and markets a wide range of innovative vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

The Vaxxinoa Group, headquartered in Nijmegen, the Netherlands, was officially named and founded in 2010 but can rely on expertise and presence originating from the 1960's. Our current network comprises production, research & development, sales, and diagnostic facilities in 10 countries: Brazil, Chile, Germany, Italy, Japan, Jordan, Norway, the Netherlands, Thailand, and the USA. Vaxxinoa is active in more than 60 countries.

Vaxxinoa belongs to the EW Group, a German-based family-owned company, specialized in animal genetics, animal nutrition and animal health.

The EW Group is highly committed to R&D and active in more than 100 countries.

We invest in research to achieve our ambitious goals and we are expanding our research and development department. We are looking for a talented colleague who enjoys working in an ambitious, dynamic, and flexible research environment with opportunities for further professional development.
