

RESEARCH TECHNICIAN Vaccine Research and Development (1 FTE)

Are you a talented Research Technician with experience, then we would like to welcome you in our team!

About the role.

In this role you are primarily responsible for performing laboratory experiments as a crucial part of vaccine research and development projects for poultry. These projects may involve different areas of expertise, such as virology, immunology, molecular biology, or cell biology.

Your main objective is to plan, organize, execute, and report laboratory experiments. These experiments may involve setting up, development and validation of new procedures, techniques, or assays, but they may also involve organizing and reporting animal experiments.

To this end, you will be participating in an (international) multidisciplinary product development team supervised by the project manager. You provide the team with the information they need to advance the project and complete the data package needed for the development and registration of the vaccine.

About you.

As a person, you set high standards for your own performance, and you show an intrinsic drive to succeed. You find it easy to think analytically, draw up an action plan to overcome challenges and produce high quality results. In your plan, you clearly and systematically indicate the required actions, resources and time, as well as the priorities.

A team player? That is also you; you are able to encourage constructive teamwork and you actively seek input from and provide help to others.

In addition:

- Bachelor of (Applied) Science (BSc) degree (or equivalent) in virology, immunology, cell biology or similar.
- Minimum of 3 years' working experience in a research environment
- Experience in laboratory techniques associated with virology, immunology and/or cell biology is considered a prerequisite
- Additional working experience in working with eggs and/or cell culture is an advantage
- Experience with and proactive approach to quality requirements such as GLP.
- Excellent documentation skills
- Excellent communication skills
- Professional proficiency in English both written and spoken is required, knowledge of Dutch is an advantage

Vaxxinoa Nederland B.V., part of the Vaxxinoa Group

Vaxxinoa develops, produces, and markets a wide range of innovative vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

The Vaxxinoa Group, headquartered in Nijmegen, the Netherlands, was officially named and founded in 2010 but can rely on expertise and presence originating from the 1960's. Our current network comprises production, research & development, sales, and diagnostic facilities in 10 countries: Brazil, Chile, Germany, Italy, Japan, Jordan, Norway, the Netherlands, Thailand, and the USA. Vaxxinoa is active in more than 60 countries.

Vaxxinoa belongs to the EW Group, a German-based family-owned company, specialized in animal genetics, animal nutrition and animal health.

The EW Group is highly committed to R&D and active in more than 100 countries.

We invest in research to achieve our ambitious goals and we are expanding our research and development department. We are looking for a talented colleague who enjoys working in an ambitious, dynamic, and flexible research environment with opportunities for further professional development.
