

# VAXXON<sup>®</sup> La Sota

Your reliable solution for ND protection

- Effective protection against Newcastle Disease
- Safe and easy to use from 3 weeks onwards

va:inova<sup>®</sup>

## Newcastle disease (ND)

Newcastle Disease (ND) is caused by virulent strains of avian paramyxovirus type 1 (APMV-1) of the genus Avulavirus which belongs to the family Paramyxoviridae. The ND virus (NDV) has shown to be able to infect over 200 species of birds, but the severity of the disease produced varies with both the host and the strain of the virus. Even APMV-1 strains of low virulence may induce severe respiratory diseases when exacerbated by the presence of other organisms or by adverse environmental conditions. Since its recognition in 1926, ND is regarded as being endemic in many countries ([www.oie.int](http://www.oie.int)).

# VAXXON® La Sota - Your reliable solution for ND protection

broilers  
layers  
breeders

## Target Species

Chicken (broilers, layers and breeders).

100, 200,  
1000,  
2500 ds.

## Indications

VAXXON® La Sota is for the booster vaccination against Newcastle Disease to reduce lesions, mortality and clinical signs of the disease.

## Dosage and method of administration

Each vial contains 100, 200, 1,000 or 2,500 doses of vaccine.

First administration: from 21 days of age onwards.

Booster: every 2-3 months, depending on the local situation.

Contact your veterinarian for advice.

21 to 28  
days

## Immunological properties

Stimulation of active immunity against Newcastle Disease.

## Shelf life

The product in the original packaging can be used until 24 months from the manufacturing date.

24  
months

## Storage conditions

The product must be stored at 2°C to 8°C.

Do not freeze.

Protect from light.
