Associate in vaccine development

Keywords:

Industry: animal health / **Segment:** R&D / **Location:** Zagreb (Rakov potok) / **Contract:** Permanent contract, Full Time

About Vaxxinova

Vaxxinova develops, produces and markets a wide range of innovative licensed and autogenous vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

The Vaxxinova Group, headquartered in Nijmegen, the Netherlands, was officially named and founded in 2010 but can rely on expertise and presence originating from the 1960's. Our current network comprises production, research & development, sales and diagnostic facilities in 12 countries: Brazil, Chile, Croatia, Germany, Italy, Japan, Jordan, Norway, the Netherlands, South Africa, Thailand and the USA. Vaxxinova is active in more than 75 countries.

At our R&D site in Zagreb, Croatia, a dedicated team focuses on research, development and regulatory affairs for a range of poultry vaccines.

Vaxxinova belongs to the EW Group, a German-based family-owned company, specialized in Life Sciences; genetics, diagnostics and healthcare sectors. The EW Group is highly committed to R&D and active in more than 100 countries.

About the role

As an Associate in Vaccines development, you will actively contribute to the discovery, development, registration, and delivery of veterinary vaccines. You will be responsible for conducting pre-defined experiments to produce reliable and precise data, supporting formulation development, bioassays, immunological and analytical methods, process optimization, and stability testing.

You will be part of a multidisciplinary product development team and work closely with colleagues to ensure smooth laboratory operations and successful project outcomes.

Main responsibilities

- Performing development trials and laboratory experiments as part of vaccine research and development projects.
- Maintaining proper records according to company policies and legal requirements.
- Operating and maintaining laboratory equipment, including preparation, labelling, and storage of media, stabilizers, and other reagents.
- Preparing and sterilizing laboratory glassware and disposable plastics.
- Ensuring the laboratory is well-stocked and resourced, and keeping equipment in a clean and serviceable condition.
- Participating in equipment installation, calibration, and qualification.
- Organizing waste disposal.

**About you**

You set high standards for your own performance, are detail-oriented, and have good organizational skills. You are a team player, able to maintain constructive teamwork, and you actively seek input from and provide help to others.

Your profile

- Work experience in a laboratory environment.
- Good lab hygiene and organizational skills.
- Experience in vaccines development, molecular methods, and/or GMP is desirable.
- Basic knowledge of the English language.

Organisation

- This position reports to the Associate Director Vaccines
- Location: Vaxxinoa Zagreb, located in Rakov potok

What does Vaxxinoa offer you?

Working at Vaxxinoa means working in an open and professional environment where we value respect, open communication, and integrity.

You will work in a pleasant team of professionals in an informal, open and inclusive international environment where we like to work hard but also have fun.

Besides a good salary, Vaxxinoa has excellent fringe benefits, flexible working hours, and we foster continuous development and learning.

Our hiring process.

After your application, we will screen your CV and if positive- you will have interviews with

- Colleagues from R&D: Scientists and Technicians
- Associate Director Vaccines
- HR Director

If you are passionate about vaccine research and development and eager to contribute to a forward-thinking company, we would love to hear from you!
