

Are you a talented and enthusiastic Research Technician, eager to work in a veterinary pharmaceutical company then we are looking for you!

We have an exciting new job opportunity in the Research and Development department in Nijmegen and are looking for a

Research Technician (0,9-1 FTE)

Keywords:

Industry: animal health / ***Segment:*** livestock licensed and autogenous vaccines and diagnostics / ***Location:*** Nijmegen, The Netherlands / ***Contract:*** 12 months contract with option for extension, Full Time

About the role.

In this role as research technician, you are primarily responsible for performing laboratory experiments as a crucial part of vaccine research and development projects for poultry. Different areas of expertise are involved, such as virology, parasitology, bacteriology, immunology, molecular biology, or cell biology.

Your main objective is to plan, organize, execute, and report laboratory experiments. These experiments involve the design, development and validation of procedures and methods, but they may also involve organizing and reporting animal experiments.

You will be participating in a multidisciplinary project research & development team supervised by the project manager. In this team, you work closely with the researchers to ensure smooth laboratory operations.

About you.

You set high standards for your own work and performance; you are critical and have attention for detail. You think analytically, draw up an accurate research plan and produce high quality results. You are a team player, able to maintain constructive teamwork and you actively seek input from and provide help to others.

Your profile:

- Bachelor of (Applied) Science (BSc) degree (or equivalent) in virology, parasitology, bacteriology, immunology, cell biology or similar.
- Relevant experience with virological, parasitological, bacteriological, immunological and/or cell biological laboratory techniques is considered a prerequisite.
- In addition, working experience with test development (of assays such as virus titrations on eggs and cells, ELISA, immunofluorescence assays) and assay validation is an advantage.
- Working experience in a research environment is preferred.
- Experience with and proactive approach to quality requirements such as GLP.
- Attention to detail and accurate documentation skills.
- Ability to work independently and as part of a team.
- Good knowledge of the English language orally and in writing; Dutch is an advantage.
- Strong communication and interpersonal skills.

What does Vaxxinoa offer you?

- An open and inclusive international work environment.
- Flexible working hours.
- A competitive salary with 8% holiday allowance and a bonus opportunity.
- 30 holidays.
- A solid pension plan.
- A culture of continuous development and learning.

Our hiring process.

After your application, we will screen your CV and if positive, you will have interviews with

- Colleagues from R&D: Project Managers and Research Technicians
- HR Manager
- Director R&D

About Vaxxinova

Vaxxinova develops, produces and markets a wide range of innovative licensed and autogenous vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

The Vaxxinova Group, headquartered in Nijmegen, the Netherlands, was officially named and founded in 2010 but can rely on expertise and presence originating from the 1960's. Our current network comprises production, research & development, sales and diagnostic facilities in 12 countries: Brazil, Chile, Croatia, Germany, Italy, Japan, Jordan, Norway, the Netherlands, South Africa, Thailand and the USA. Vaxxinova is active in more than 75 countries.

Vaxxinova belongs to the EW Group, a German-based family-owned company, specialized in Life Sciences; genetics, diagnostics and healthcare sectors. The EW Group is highly committed to R&D and active in more than 100 countries.

Ready to make an impact? Send us your CV today and start your journey with Vaxxinova!
